Severe Impacts

# **WEATHER KEY POINTS**

**04/15/22 - 04/21/22**

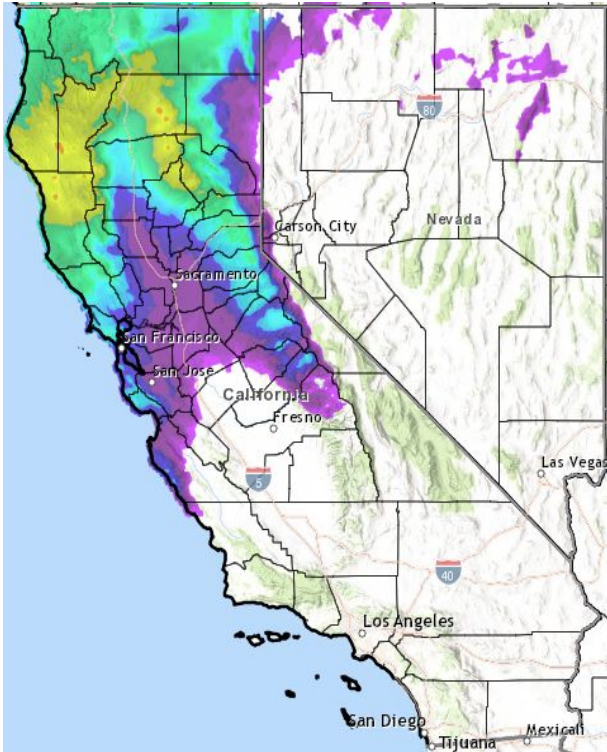

## **Friday - Thursday**

- The weather pattern will remain active into early next week across much of northern and central California, with several additional rounds of lower elevation showers and mountain snow expected
  - Snow levels will vary between 4,000 and 7,000 feet through early next week
  - Locally heavy snow accumulation is expected in the Sierra, with totals of 1 to 3 feet through next Tuesday
  - Some impacts to mountain travel are likely the next few days
- Several rounds of gusty west to southwest winds will be seen along and east of the Sierra as well as the northern California mountains and Modoc Plateau through next Tuesday
  - Gusts of 35 to locally 55+ mph are expected
  - The strongest winds are expected on Saturday
- Southern California will remain dry over the next 7 days

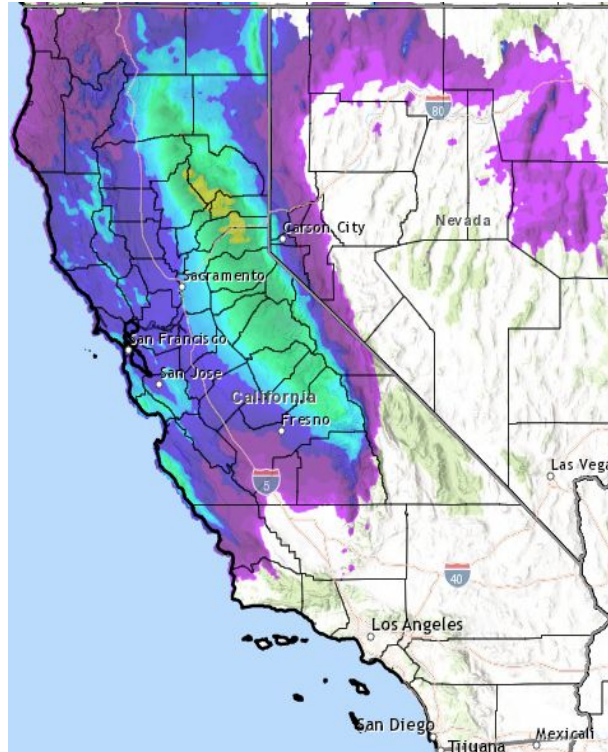

# PRECIPITATION FORECAST

04/15/22 - 04/17/22

Friday

Saturday

Sunday

**Note:** Forecast precipitation amounts are an average for any particular location. Thunderstorms may produce locally higher rainfall amounts.

**Precipitation (inches)**

# **WEATHER OUTLOOK**

**04/20/22 - 04/28/22**

## **6-10 Day Outlook (April 20 - April 24)**

### **Temperatures**

- Below normal temperatures are favored for the majority of the state

### **Precipitation**

- Above normal precipitation is favored statewide

## **8-14 Day Outlook (April 22 – April 28)**

### **Temperatures**

- Below normal temperatures are favored for much of the state, except for far southern California where near normal temperatures are favored

### **Precipitation**

- Below normal precipitation is favored across northern California, with near normal precipitation favored across the south
